Short-Term Authority for Wireless Radio Equipment

Hello Teams,

Industry Canada manages the wireless frequency spectrum in Canada and is mandated to ensure existing radio station licensees are protected from harmful interference as specified in the *Radiocommunications Act*. Therefore all users of wireless radio equipment, such as two-way radios, must have their equipment inspected prior to use.

Industry Canada will be on-site at the IBU Cup Biathlon in Canmore, Alberta, to inspect and validate your wireless equipment. Please bring your equipment to our inspection station located in the Bill Warren Training Centre. Radio licences will be issued if necessary at no charge. Please note cellular telephones are excluded.

If you have any questions or are unsure about your wireless equipment, please visit us at our inspection station.
